* The population calculation for this area provides the population within the UA that is not located within an incorporated place. An incorporated place is created to provide governmental functions for a concentration of people. For example, a city or municipality is an example of an incorporated place.

** Some incorporated places appear twice since they are located within multiple counties. To calculate the total population within the incorporated place add all values associated with it together. For example, the population of Hattiesburg is 39,797 + 2,304 = 42, 101.

*** An airport is located in this section of Jackson, MS and therefore no one resides here.
